

Activity 2 - KNIME GitHub Evidence

Student: Jamella Tracy L. Dancel

Course and Section: CS0065 - BSCS-SE, AN42

Repository: github.com/jampott-dev/DANCEL-Jam-CS0065-AN42

1. Local Demo Project Folder Prepared

The required project files were placed together in the DemoEarlyWarningTool folder before upload.

File	Purpose	Verified size
DemoEarlyWarningTool.knwf	Exported KNIME workflow	72,507 bytes
student_performance_knime.csv	Student performance dataset	918 bytes
README.md	Project description and run instructions	932 bytes

2. Workflow Contents Verified

The exported .knwf archive was inspected. It contains a CSV Reader, Logistic Regression Learner and Predictor, Random Forest Learner and Predictor, Decision Tree Learner and Predictor, Table Partitioner, Normalizer, Column Filter, and three Scorer nodes.

3. Dataset Verified

The dataset uses the fields student_id, attendance, quiz_score, assignment_score, exam_score, and risk_status. The README identifies the workflow, dataset, algorithms, and the steps for importing and running the workflow in KNIME Analytics Platform.

Evidence Summary

The following pages provide screenshots of the KNIME workflow and the public GitHub repository. The GitHub screenshot shows the required DemoEarlyWarningTool folder and the latest upload commit.

4. KNIME Workflow Screenshot

The workflow includes CSV Reader, preprocessing nodes, Table Partitioner, Decision Tree, Logistic Regression, Random Forest, predictors, and Scorer nodes.

5. Public GitHub Repository Screenshot

The repository is public. The screenshot shows the required DemoEarlyWarningTool folder and the latest commit that added the KNIME workflow, dataset, and evidence PDF.
